TECHNICAL SKILLS

HTML CSS Javascript React Nextjs Firebase Sanity.io

TailwindCSS Figma C++

Projects

Personal Blog 📎

- Designed and developed my own blog using Next.js, Typescript and TailwindCSS
- Deployed on Vercel and uses MDX for the blog posts
- Obtains an average score of 98 on Lighthouse

Twittter Clone 📎

- Built a Twitter Clone that includes authentication and data storage using Next.js, Tailwind and Firebase
- Uses Redux for state management
- Deploys on Netlify - Like posts, comment and more!

Medium Clone 📎

- Blog clone made using Sanity.io as the CMS for the blog posts
- Fetches the data from API endpoints
- Does well on SEO

Certificates

HTML *(codecademy)* 📎   Javascript *(codecademy)* 📎

CSS *(codecademy)* 📎   React *(codecademy)* 📎

Interests/Hobbies

I have a growing interest in competitive programminng. I also participate in athletics (mainly sprinting and jumping events), winning first place for the Borough Athletics in triple jump. I also play basketball for the school team! I have been playing chess for most of my life, mostly 30-second online games on Lichess.org, reaching the top 9% on the website!

About Me

My passion for web development sprouted after an introduction to HTML and CSS in Year 7. I immediately fell in love with web development and thought it very interesting. I built projects using only HTML, CSS and Javascript, as well as a form website (archived now), before moving on to cooler things like React to build more complex projects.
In the near future, I want to build a forums app where people can chat about different topics in separate forums - kinda like Reddit!
